

#### **Moisture Balance**

UTW-0610

The UTW-0610 Moisture Balance is used to determine the moisture content of relatively small samples of various substances.

#### **Electronic Analytical Balances**

The UTW Series of Electronic Analytical Balances set the standard in terms of reliable measurements, user-friendly operation and long service life. The series includes a variety of capacities from 200g to 510g, with high sensitivities of up to 0.01 mg readability, making these balances ideal for weighing small sample amounts. The balances can be used for routine tasks and/or complicated weighing procedures. Majority of the models in the series require external calibration, however the UTW-0620 and UTW-0622 models include an automatic internal calibration feature. The Analytical Balances have been designed to allow fast and simple installation and are easily cleaned. They can also be connected to printers or PC's through RS 232 outputs to give excellent monitoring and reporting performance.

#### **Digital Balances**

The UTW Series of Digital Balances are perfect for central and site laboratories who require a range of balances for various applications. The maximum capacity of the balances varies greatly in the series and the readability characteristics make them simple to use. The balances are equipped with strain gauge loads cells.

## **UTW-0610 Features**

- Easy operation provided by back lit LCD display
- Drying profile (standard, mild, step, rapid)
- Finish mode (manual, humidity stabilization, automatic, time defined)
- GLP/GMP printouts and reports
- Halogen lamp
- Standard and non-standard applications
- Optimization of work ensured by halogen lamps mode

## **Digital Balances Features**

- Large, back lit LCD display that allows for accurate measurements within the 0°C to 40°C temperature range
- Internal automatic calibration feature
- Can be connected to printers or PC's through RS 232 outputs
- Supplied with 220-240 V, 50-60 Hz AC/DC adapters.

#### **Digital Platform Scales**

The UTW Digital Platform Scale series is economical and allows for quick and simple weighing. The scales have a weighing facility of up to 150kg maximum capacity, with different readability values. These balances have been manufactured to carry out accurate measurements under extremely heavy conditions.

#### **Specific Gravity Frame**

UTW-1000

The UTW-1000 Specific Gravity Frame has been designed to be used in conjunction with a suitable electronic balance for specific gravity determination of fresh and hardened concrete and aggregates. The apparatus consists of a sturdy frame designed to support the electronic balance. The lower part of the frame includes a moving platform, which carries the water tank. This allows the test specimens to be weighed in both air and water. Any type of electronic balance fitted with underbench weighing facility can be used. Balance, Cradle and Density Basket should be ordered separately.

The Specific Gravity Frame is supplied complete with;

• A water tank

### **About PCTE**

PCTE have over 30 years' experience in the measurement and testing of construction materials. PCTE can provide more than just the equipment, they can provide expert training. PCTE have a service centre in Sydney in which they can provide calibration, repairs and warranty repairs.

## **Other Equipment**

PCTE supply three main ranges: NDT, Lab and Geotech Instrumentation.

NDT includes: Rebound Hammers, Covermeters, Ultrasonics, GPR, Corrosion Testing, Coating Testing and Foundation Testing

Lab includes equipment for: Concrete, Cement, Aggregate, Soil, Asphalt and Metal

Geotech Instrumentation includes: Strain Gauges, Piezometers, Inclinometers, Extensometers, Tiltmeters, Load Cells and Dataloggers

Moisture Balance	
Capacity	50 g
Pan Size	Ø 90 mm
Readability	1 mg
Maximum Sample Mass	50 g
Moisture Reading Accuracy	0.001 %
Repeatability	± 0.24% (sample < 2 g), ± 0.06% (sample 2-10 g), ± 0.04% (sample > 10 g)
Maximum Drying Temp.	160°C
Drying Modes	4 Modes: Standard / Quick / Step / Mild
Power of Heater	400 W
Power Supply	110-240 V 50-60 Hz AC
Display	LCD (back lit)
Dimensions	210x335x190 mm
Weight (approx.)	5 kg
